ATTN: Alliance for Renewable Clean Hydrogen Energy Systems (ARCHES)

RE: Support for Green Hydrogen Hub in Los Angeles

The **Sustainable Production Alliance (SPA)** is a consortium of the world's leading film, television and streaming companies dedicated to accelerating the transformation of the entertainment business into a more sustainable industry.

SPA is aggressively working to reduce the environmental impacts of physical film and television production. Our last report "[\*Close Up: Carbon Emissions of Film and TV Productions\*](#)" shows that emissions from fuel use are most often the primary contributor to a production's carbon footprint. To facilitate our transition away from fossil fuels, **we are actively seeking new pathways to decarbonize** the fuel used to power our equipment and heat our buildings. We believe emerging technologies like **green hydrogen** will be required to achieve our ambitious greenhouse gas emissions reduction goals.

We support the deployment of funding for green hydrogen projects. Such projects will require cross-industry collaboration. The Alliance for Renewable Clean Hydrogen Energy Systems (ARCHES), funded by the State of California, will serve as the unifying body accountable for submitting California's Hydrogen Hub application and implementing a hydrogen program at scale.

The SPA supports the efforts of ARCHES and looks forward to collaborating on a system that leverages cross-sector synergies to create opportunities for **green hydrogen-based market expansion in the Los Angeles region**.

We will continue to track our carbon emissions and engage with our film and TV productions in the quest to reduce our environmental impact. We encourage you to join us in supporting these efforts.

Thank you,
